

# Installation Instructions

## TeamViewer 11.2 Unattended Installer

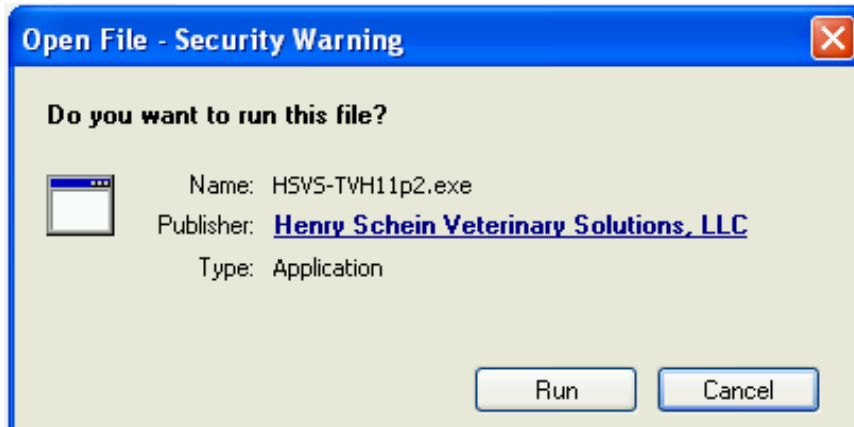

**This version is recommended for Windows XP.**

Download and extract your installer file:

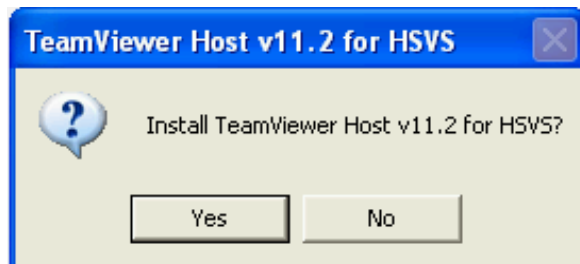

Run the self-extracting installer:

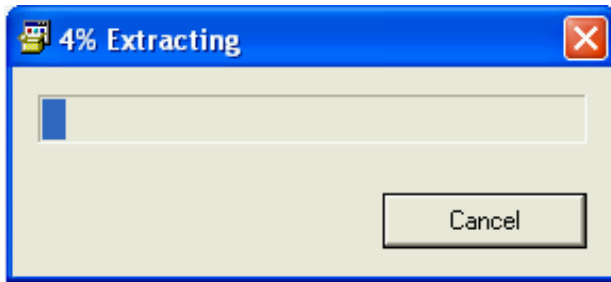

Click "Run" on the open file security warning (if any):

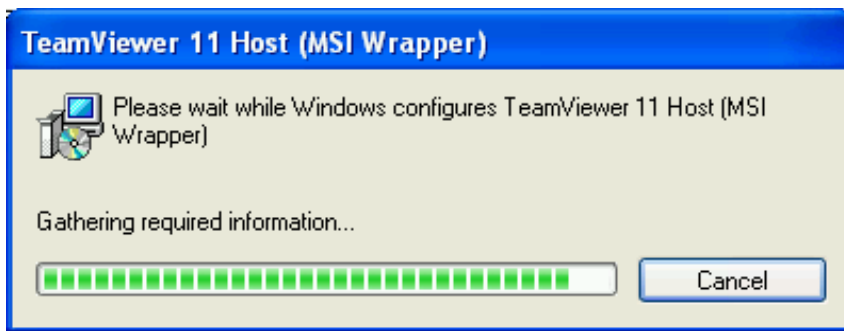

Click "Yes" when prompted to install TeamViewer Host for HSV5:

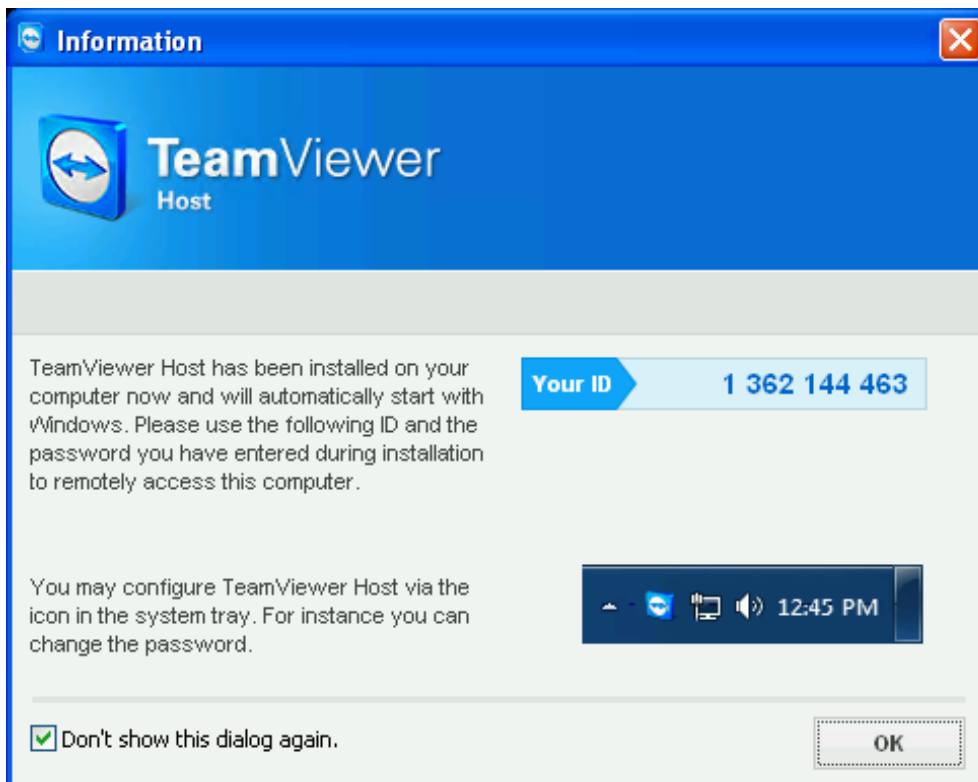

The archive will extract itself:

The installer will then automatically run with preconfigured settings:

When the installer finishes a TeamViewer information screen will appear with the ID:

Run the TeamViewer shortcut from the desktop in cases where the information screen does not appear on its own and verify it is running with a valid ID:
